EDUCATION

Denison University | Granville, OH — Expected May 2027
B.S. in Computer Science; Minor in Digital Humanities — Dean's List; GPA: 3.65
Relevant Coursework: Data Structures, Algorithm Design, Computer Systems, Object-Oriented Programming

SKILLS

Languages: Python, JavaScript, C++, R, Swift, Go
Frameworks/Libraries: React, Node.js, PyTorch, TensorFlow, pandas, SwiftUI | **Tools:** Git, Tableau, n8n

WORK EXPERIENCE

Denison University | Granville, OH

AI and Innovation Intern, Denison AI / King Center — Aug 2026 - Present

- Developing Socratic AI chatbots for Denison's modern language courses, helping instructors identify student learning gaps while protecting student privacy.
- Leading research on fair token allocation for Denison's AI platform, advised by a CS professor.
- Built an automated pipeline and JavaScript dashboard tracking 100M+ monthly tokens across Anthropic and OpenAI, giving university staff visibility into adoption, usage trends, and costs.

AI Ambassador and Programs Intern, Information Technology Services — May 2026 - Aug 2026

- Developed an event management website consolidating schedules, attendance, and credit records across 3 university departments for weekly AI and tech events with 100+ attendees.
- Designed and deployed an AI-powered event planning workflow for 15+ team members, streamlining feasibility and privacy compliance reviews and eliminating 6 manual steps per evaluation.
- Co-designed and taught a 4-day AI literacy camp for 30+ high school students.

HeyPossible Inc | Seattle, WA | AI Automation Intern — Jun 2025 - Aug 2025

- Built and deployed a Node.js mentor-matching system implementing ranked preferences, capacity constraints, and fallback logic; integrated Airtable, Sheets, Tally, and Slack through APIs + webhooks.
- Partnered with the CEO to design intake, matching, and scheduling workflows for recurring summer cohorts of 200+ students, saving staff 4-6 hours per week with no double bookings.

Adept Tech Solutions | Islamabad, Pakistan | GenAI Intern — May 2024 - Aug 2024

- Developed a multi-step LLM workflow in Python to automate resume screening, interview-question generation, and scoring, reducing recruiter review time by 80% in a pilot.

PROJECTS

Hot Wheels Garage: iOS Visual Recognition App | Personal project

- Built a native iOS app in Swift/SwiftUI to capture photos and identify individual Hot Wheels models.
- Improved identification accuracy from 72% to 91% on a 100-image evaluation set by refining image preprocessing, prompts, and recognition logic.
- Implemented request validation, retries with backoff, and typed JSON decoding to handle API failures; added local persistence for user collections.

Re-Imagining Sirkap: AI Reconstructions of Archaeological Sites | Undergraduate Researcher

- Mapped 200+ archaeological features using Python and ArcGIS.
- Published an interactive reconstruction of ancient Sirkap, grounding AI-generated visuals and audio in archaeological findings from 50+ excavation reports.

LEADERSHIP

Across several leadership roles (2024 - Present), organized **60+ campus events** featuring high-profile speakers, faculty, and alumni; managed combined budgets exceeding $10K. Highlights include:

- Student Rep (1 of 2) on **Denison University's AI Policy Committee** advising campus-wide guidelines
- President of **Women in Math, Data Analytics and Computer Science**
- **Computer Science Department Fellow** (1 of 4)
- Tech and Data Science Peer Career Fellow at **Denison Knowlton Center**
